Keewatin-Aski Ltd. (KAL) is a well-established engineering and architectural consulting practice strategically based in Northwestern Ontario in a central hub that serves regional communities and municipalities. With a solid reputation for delivering cost effective and sustainable approaches to project assignments, KAL offers clients the expertise of senior level professionals supported by an experienced group of engineers, architects and technologists.

KAL is seeking an experienced **Civil Engineer** to join their team based in Sioux Lookout, Ontario!

Sioux Lookout has the amenities of a larger city paired with the friendly support of a small town. The lakes and forests provide an abundance of summer and winter activities including camping, fishing, hiking, snowmobiling, and ice fishing ideal for outdoor enthusiasts.

Job Responsibilities:

- Responsible for managing, designing, coordinating, executing infrastructure projects from the planning and conceptual stages through to contract document production, tendering and total construction completion.
- Attend / lead project and client meetings. Perform site reviews as necessary.
- Manage technical staff, assign work, monitor project schedules and review work of technical staff.
- Prepare proposals and participate in business development and administration activities.

What KAL offers:

- Great office environment and newly constructed collaborative workspace
- Great benefit package
- Good work life balance
- Shareholder opportunity
- Exceptional experience and job satisfaction that cannot be offered by large-scale firms

QUALIFICATIONS & SKILLS

- Professional degree in Civil Engineering from an accredited Canadian university
- Licensed membership with a provincial engineering association
- 10 years practicing in an engineering firm, including a minimum of 5 years practice in Canada since licensure
- Expertise in municipal civil works with specific practice areas of proficiency in water, wastewater, and stormwater engineering
- Demonstrated knowledge of civil infrastructure, design, constructability, detailing, materials, and industry associated standards.
- Ability to write technical design reports, proposals and technical specifications.
- Skills in AutoCAD and Civil 3D an asset.
- Well versed in provincial and federal regulatory requirements and standards.
- Strong leadership and relationship building skills with the ability to effectively manage project teams and multiple priorities and tasks
